My Edge Pro - Does it work or is it a ripoff?

My Edge Pro - Total ripoff? Simply put, if this ends up on the first page of your local search engine, then yes, it does suck. I am so sick of their stupid commercials claiming they can make your bad reputation good again by burying it with positive information I just had to try. On their website here they claim to "Protect your good name online". I am always leery of businesses like this. I just wanted to see if I could sully their "reputation". Hi Guys.

Update - After one day - Reputation Defender knocked me off page one of Google. hmmm, maybe they have found a way to game the system.

Wpate 7-8-10 = also again one page one of google. Fifth or Sixth result.... Suck it rip-off scam artists!
